25X1

ILLEGIB

25X1

Attention:

Dear

Wednesday, June 14, I spoke to [redacted] regarding the drawings 25X1  
that are enclosed. There are two sets of drawings, the 354 series  
along with specifications for an incinerator, and the 342 series for 25X1  
a rotary paper destroyer.

We are interested in fabricating ten (10) of the Model 1 Air-Fod  
Incinerators. Your proposal should include everything except the motor-  
blower assembly shown in drawing number 354-437. The company that re-  
ceives the contract will receive a motor-blower assembly to be used  
during the testing.

We are interested in fabricating two (2) of the Rotary Paper  
Destroyers. These two units are to be fabricated for foreign service  
use. When fabrication is complete, these units are to be completely  
assembled, for my assurance that they will fit together, and then dis-  
assembled and shipped in this disassembled condition.

What I would like for you to do at this time is to look these  
drawings over carefully to see if you are interested in submitting pro-  
posals for these two jobs. I will call you in about two weeks to ar-  
range for a suitable date for my visiting you, so we can discuss the  
jobs in more detail. If you decide you would like to submit proposals  
for these two fabrications, we would like to have these proposals by  
July 24.
